## International infosyon Conference “Coming Together - Sharing Experience”

July 25-26, 2009, near Venice, Italy

in cooperation with

## & infosyon Organisational Constellations-Workshops @ METAFORUM Summercamp 2009

## Why it is a very good idea to be a part of this Conference...

At the moment we are all witnessing a collapse of the global illusion of control. Shaken by the force of the financial and economic crises, even the most brave advocates of causal thinking, are using terms such as 'own momentum', 'out of control' or 'not foreseeable'. This could lead to the beginning of an immense promotion of systemic access and particularly for the method of system constellations.

Now the door is wide open to show what this method can do!

This is the challenging background for the International infosyon Conference 2009 in Abano, Italy. It shall become a vital **Coming Together and Sharing Experience** of the organisational constellation community from all over the world. The conference will be held in English!

Our two day programme will be a **common iterative process**. After receiving a strong impulse from our Key-Note-Speaker Doris Wilhelmer (Aut) - *How to turn round (OE) processes*, an interactive process will begin: In 9-10 prepared workshops, international professional facilitators will present their experience of organisational constellations in various settings, countries and cultures. Participants are warmly invited to contribute their own approaches. There will also be an experimental plenary constellation of a contemporary topic, e.g. the financial and economic crises. During the conference there will be many opportunities for professional networking and the building of special interest-groups.

To continue infosyon's pathway of integrating organisational approaches and tools the conference will be held in cooperation with METAFORUM – within the 4 week interdisciplinary Summer Camp 2009, in Abano, Italy. So, for the first time, infosyon and its community will be represented officially at this major interdisciplinary event.

Apart from our infosyon Conference there will be 3 open workshops and a presentation at the METAFORUM *Future Conference*, offered as infosyon's contribution to the METAFORUM programme (see right side). Matthias Varga v. Kibéd and Insa Sparrer have already paved the way during the last Summer Camps and will again be one of the METAFORUM highlights in 2009, as well as leading developers from other main methods such as Stephen Gilligan, Bernd Isert, Gunther Schmidt, Robert Dilts and many others.

Come to Abano and be part of this inspiring event!  
*We are looking forward to meeting you and welcoming you there.*
